

Editorial precision, terminal *warmth*.

A personal design language built on archival paper, a single rust accent, literary serif, and mono metadata. Restraint as a feature — every output reads like a well-typeset spec sheet, not a SaaS page. This document was generated with the **atharva-design** skill, rendered to print via WeasyPrint.

// 00 — AT A GLANCE

SYSTEM SUMMARY

SURFACES

3

Warm cream, layered — no white

ACCENT

≤5%

One rust note, surgical

FAMILIES

3

Serif · sans · mono

INVARIANTS

8

Each with a known cost

// 01 — COLOR

WARM NEUTRALS • ONE ACCENT

A palette of *paper and ink*.

A warm cream canvas anchors everything; a single rust accent does the emotional work. Every neutral carries a yellow-brown undertone ($R \geq G > B$) — never a cool blue-gray.

SURFACE 01 Canvas #F4EFE4	SURFACE 02 Panel #ECE5D2	SURFACE 03 Deep #E4DCC4	ACCENT Rust #C0622A	ACCENT DEEP Pressed #8A4218
INK 01 Body #1A1A1A	INK 02 Secondary #3A352D	INK 03 Label #8A8377	LINE Hairline #D9D1BC	TAG TINT Solid #E7D4BF

A serif for *voice*. A mono for *truth*.

Fraunces carries headlines; its italics replace bold. Inter handles reading at 10pt / 1.55. JetBrains Mono labels everything technical. Serif weight locked at 500.

DISPLAY

Fraunces • 500 •
-2.5% track

Give it *supermemory*.

HEADING

Fraunces • 500 •
16pt

A real POSIX mount, not another API.

BODY

Inter • 400 • 10pt /
1.55

The system reads like a well-typeset technical manual. Read it with `ls`, `cat`,
and `grep` — restraint, rhythm, and a live profile included.

MONO • CODE

JetBrains Mono • 9pt

```
$ curl -fsSL example.ai/install | sh
```

UPPERCASE • +18%
track

// VIRTUAL FILE — 01

Schematic cards. *Cornered*. Numbered.

Every container reads like it was pulled from a technical drawing — hairline borders, accent-tipped corners, mono index numbers. Tag tints are solid hex, never rgba (the WeasyPrint double-rectangle rule).

```
grep ~/legal/
```

001

Legal search

Search contracts and compliance docs by meaning. Find the clause without the exact wording.

```
cat profile.md
```

002

Live profile

A virtual file synthesized on read from every memory. Not stored — regenerated on demand.

```
ls ~/research/
```

003

Semantic default

Search returns meanings, not substrings. Ask for "my pdf" — get the invoice you saved.

● READY

INSTALL.SH

```
$ curl -fsSL example.ai/install | sh
```

```
$ mount my-project
```

```
# → and you're done. we'll do the rest.
```

Lists and tables, *quietly composed*.

Round bullets read juvenile next to serif copy — a short accent bar reads editorial.
Numeric tables align on tabular figures with a single hairline per row and an accent total.

- Editorial mode — no decorative lines; the accent lives only in text. Reads as "content speaks."
- Structured mode — top hairlines on cards and cells, 5–8 accent lines per page. Reads as "structure helps."
- The failure mode — lines plus fills plus radius plus borders all at once. Over-packaged. Pick one and hold it.

METRIC	BEFORE	AFTER	Δ
Tokens per task	1,212,380	203,427	–83%
Tool calls	116	42	–64%
Correctness	16 / 20	18 / 20	+12%
Net effect	—	more with less	✓

The system's *eight commitments*.

INVARIANT 01 Paper, not screen. Warm cream canvas with a dot-grid. Depth from tinted layers, never elevation. cost: reads as generic SaaS	INVARIANT 02 One accent, ≤5%. Rust does all the emotional work and stays under five percent of the surface. cost: feels like a brand slapped on
INVARIANT 03 Warm neutrals only. Every gray has a yellow-brown undertone. $R \geq G > B$. Four ink levels, no fifth. cost: one cool gray cheapens it	INVARIANT 04 Mono as metadata. Labels, indices, states, versions — all monospace. The serif speaks; mono annotates. cost: loses the spec-sheet feel

INVARIANT 05

Italic, not bold.

Serif italic in the accent color replaces bold. Weight locked at 500.

cost: muddy, undercuts the tone

INVARIANT 06

Hairlines, soft depth.

Thin borders and corner ticks. Depth is a whisper shadow — never a hard drop shadow.

cost: hard shadows read digital

INVARIANT 07

Number everything.

Sections, cards, principles carry mono indices. Numbering implies authorship.

cost: work feels accidental

INVARIANT 08

One decoration density.

Editorial or structured, never both. When unsure, default to editorial.

cost: over-packaging
